

CORRECT USE OF YOUR FIX2CAR® HOLDER:

1. Gently press your phone down over the bottom connector on the holder. Do this with the phone slightly angled and without touching the wing arms.

2. With the phone fixed to the bottom connector you can now lean back the phone in between the wing arms. Always use the reverse procedure to remove your phone from the holder.

Please don't do this. It will leave marks on your phone/cover and it may damage the wing arms.
